(54) Title: SELF-CALIBRATING, MULTI-CAMERA MACHINE VISION MEASURING SYSTEM

(57) Abstract: An apparatus and method for calibrating machine vision measuring systems that have more than one camera are disclosed. A first calibration target is mounted in a fixed relationship to a first camera of the machine vision measuring system. A third camera mounted in a fixed relationship to a second camera of the machine vision measuring system. Second and third calibration targets are mounted in a fixed relationship to one another and viewable by the first camera and by the third camera. A data processor is programmed to compute calibration of the first camera and the second camera, based on a position of the second calibration target relative to the third calibration target and based on a position of the first camera with respect to the third camera. The apparatus and method provide a way to continuously measure the positions of two or more cameras used in the measuring system, and to use such measurements to calibrate the system. If the cameras move with respect to each other, their respective positions are calculated and used in subsequent measurements. The apparatus and method enable a machine vision measuring system to be used without field calibration at the time of installation.

## INTERNATIONAL SEARCH REPORT

International Application No

PCT/US 01/08584

## A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 G01B11/275 B25J9/16 G01C11/06 G01S5/16

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 G01B G01C G01S B25J

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	FR 2 764 992 A (GRANGER ROMAIN) 24 December 1998 (1998-12-24) the whole document	1, 19, 21, 36, 38
X, P	WO 00 16121 A (QUALISYS AB) 23 March 2000 (2000-03-23) the whole document & SE 9 803 102 A (QUALISYS AB) 12 March 2000 (2000-03-12)	1, 19, 21, 36, 38
P, X	EP 1 003 011 A (EUROP D EQUIPEMENTS DE GARAGE) 24 May 2000 (2000-05-24) the whole document	1, 19, 21, 36, 38
A	EP 0 149 690 A (ALPHA TECHNOLOGIES LTD) 31 July 1985 (1985-07-31) the whole document	19, 21

☒ Further documents are listed in the continuation of box C.☒ Patent family members are listed in annex.

## \* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*&\* document member of the same patent family

Date of the actual completion of the international search
